

Instruction 4

Please visit our YouTube channel for all the **set up videos** at: <http://www.youtube.com/user/wheelstandpro> or scan the QR code

Please mount your keyboard holders from the bottom of the main plate. To do that use 4 conical screws (M6x12), and 4 M6 cups.
 Next mount 4 rubber bushings with 4 Allen screws (M6x55) and 8 M6 cups - **see mounting video**.
 Finally place your keyboard on the keyboard holders and tighten it with 4 rubber bushings to secure the keyboard from sliding.
PLEASE SEE SET UP VIDEO.

Unique design of the keyboard holders allows to use keyboards with uneven shapes.

Tightening the screws too much can cause damage to the joystick, throttle and pedals.
